DIARY NOTES

JJK

DD/S

27 March 1958

1. I spent approximately an hour with [REDACTED] and his people during which time they convinced me that they needed a small laboratory. They need this facility now and cannot afford to wait until the new building is completed. In any case, this is the type of activity that could operate at least as well---and probably better---at some location removed from the building, and inasmuch as our building will not accommodate all of our people it would appear that this project at [REDACTED] in the amount of \$80,000, should be approved.

2. I had several conversations with [REDACTED] about the proposed demolition of certain of our buildings in connection with the construction of approaches to the proposed new Potomac River bridge. (See my Memorandum for the Record dated 27 March 1958.)
