DIARY NOTES

25X1A

DD/S [REDACTED]

11 January 1962

1. I have requested that Ed Saunders put two light sedans in the Fiscal Year 1963 congressional budget.

25X1A9a

2. I advised [REDACTED] of Mr. McCone's request that we report to him on the audit mechanism and procedures for Project OXCART and requested his co-operation with [REDACTED] who was developing this.

25X1A9a

3. I talked to Larry Houston about the action that he was taking on the Attorney General's recent ruling concerning advisory panels. I suggested that he draft a memorandum for the Deputy Director requiring all components to review this matter and make reports which he, together with the Inspector General, could consider in order to ensure that we were taking the necessary action to protect ourselves against criticism.

25X1A

4. I met with [REDACTED] to talk about the Automatic Data Processing program. They felt confident that they were moving about as fast as possible in the DD/I Area. This is hard for me to judge; however, both Messrs. [REDACTED] were quite convincing and most enthusiastic. They are anxious to get into the new building, if possible, and will need from 3,000 to 4,000 square feet of space. I told them that I would like very much to have them out here and that I would take this into consideration, along with our other space problems. H

5. I met with Messrs. [REDACTED] to discuss the Deputy Director (Plans)'s request of 13 October 1961 that we appoint a Task Force to study certain automation possibilities in support of the Clandestine Service. My worst feelings were confirmed; i.e., nothing was really being done about this and our proposed reply to the Deputy Director (Plans) would have been meaningless. Out of our meeting grew a feeling that there certainly were possibilities in this area, even though they were long range, and that we should study them. [REDACTED] was assigned the responsibility of pulling together the requirements, after which we will meet again and decide whether this study should be undertaken on a broad basis or a pilot basis, such as financial information only and perhaps one station only.

6. George Carey telephoned to say that he had been elected to organize a party in honor of General and Mrs. Cabell at Fort Myer on 30 January from 6:00 P.M. to 8:00 P.M. It will be a cocktail-buffet at a cost of \$6 per head and wives are invited. Until we can see how many people are going to attend, invitations should be limited to supergrades. This will be opened up later if there is enough room to accommodate additional people. I undertook to find out how many people would be coming from the DD/S Area, to collect their \$6, and forward it to George. ([REDACTED] has been assigned this responsibility.)

-25X1A9a

7. I addressed the JOT class for an hour. While they seemed to be interested in the activities of the Support Area, they did not ask any questions.

8. I talked with J [REDACTED] about the moral situation in the Automatic Data Processing Staff and told him that I had some reason to believe that everyone there was unhappy and that some allegations had been made that he was spending a disproportionate amount of his time on his book and library project. Joe seemed very surprised to hear this. He said that his Staff was so small that they were all closely associated and that there was no truth to the allegation that he was shielding himself by delegating everything to [REDACTED]. He said that he felt he had been pretty scrupulous in not using Government time for his own private endeavors and felt strongly that they had accomplished as much as they could in the DD/I Area up to this time.
