SUBJECT: Conference Report - Log Periodic Monopole

25X1A5a1

Mr. [REDACTED] was requested to submit an unsolicited proposal for the first two phases. It is felt that in the interim we could pin down our requirements for antennas such that Mr. [REDACTED] could be directed to build those types that would benefit us the most - dipole, folded dipole, and/or vertical.

25X1A5a1

Incidentally, Mr. [REDACTED] has filed a patent disclosure for this work. He has offered this idea only to this Agency.
