UNITED STATES GOVERNMENT

Memorandum

TO : Director of Communications

DATE: 1 July 1966

FROM : Chief, Engineering Staff, OC

SUBJECT: Engineering Staff Monthly Report - June 1966

The FY 1966 passed in a relatively quiet manner re both stock procurement and R&D expenditures. The last minute bulk stock procurements are handled in a very routine (?) manner now that we are experienced!

We still have four engineer applicants who have not turned down employment with us. We are in daily contact with OC-A on the status of each. OC-A is, in turn, in contact with the Office of Personnel and the individual.

Of interest, the CIFAX system was operated the entire month sans trouble. In addition the KY-3 network appears to be settling down although we are very active installing and relocating subscribers' sets.

25X1A5a1

The low bidder for the KY-3 Call Director is [REDACTED]
The cost per set is \$1,769.01 with \$883.01 GFE and \$886.00 materials and labor.

There are no crises items to report.

[REDACTED]
