Mr. [redacted] indicated that the case will be a polycarbonate vice aluminum material. This option was previously discussed with [redacted]

and is acceptable. By utilizing a polycarbonate case, the outside length will be cut by 1/2" from that of the R&D Lab's prototype. The battery indicator meter will be cemented in place to insure a better seal. A sample of the canvas carrying case has been received from the vendor but does not match our prototype.

25X1A5a1

[redacted] was urged to duplicate the prototype design as nearly as possible including the case. They agreed and indicated that a new case sample will be ready within a week.
