MEMORANDUM FOR: THE RECORD

SUBJECT : Meeting with O/C Engineering re IR Communications

1. Time and Place of Meeting: 29 October 1956, Alcott Hall.

2. Attendance:

25X1

3. Discussion:

a. [redacted] explained the misunderstanding regarding [redacted] IR relay device. It was pointed out that [redacted] device should not outperform our Model "B" as the working components are for the most part interchangeable. Four differences are: Format, the deletion of the IR viewer in the [redacted] equipment, the voice or tone-actuated relays incorporated in [redacted] equipment, and the adjustable reflector mounting.

b. The reflectors on Model "B" were discussed and it was agreed that APD should take appropriate steps to replace the present reflectors with a better quality unit.

c. An extremely narrow beam IR conumo device was mentioned by [redacted]. It was suggested that APD send a description of this proposed device to the O/C for a formal answer.

25X1

d. A tentative answer was given to the O/C request that one of the "B" units be sent to [redacted] for an evaluation and determination of the security of the system. [redacted] stated that although he would be obligated to check with [redacted] before giving a final answer, APD would be happy to have its unit evaluated.
