SUBJECT: Telephone Conversation of 24 November with Customer's Technical Representative

[Redacted]

ILLEGIB

The writer was informed that the input power plug location on the equipment, which mates with the RR-11/D receiver, has been changed from 1 inch above the table top (including feet) to 1 3/32 inches above the table top (including feet).

It was explained to the representative that to change our case at this late date would work a severe hardship on us since these cases are out for procurement. It was agreed that we would increase the height of the case feet from 3/32 to 3/16 inches to compensate for the above change.
