INTERDEPARTMENTAL CORRESPONDENCE

25X1

TO: CC: DATE: 14 July 1959

SUBJECT: (Special Power Supply, RD-103, 702) FROM: 25X1

BLDG. EXT.

On July 8, [redacted] was informed by telephone that [redacted] did not require a battery tap five cells up from ground on the positive side of the battery, as previously specified. Instead, their requirements are for taps 13 and 6 cells up from ground on both sides of the battery. This change requires an additional tap on the negative side of the battery and the shifting of the 5 cell tap on the positive battery.

25X1 25X1

[redacted] was contacted on July 9 and agreed to the above changes. A tentative pin arrangement for the interconnecting header was agreed upon and is given below:

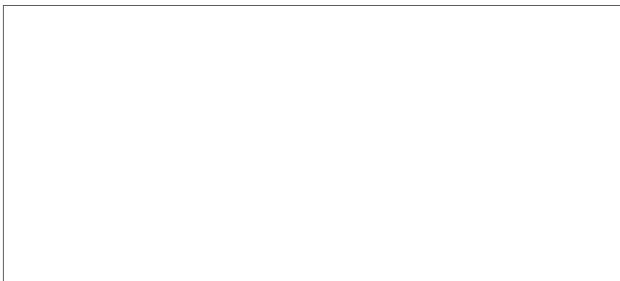

25X1

Pin 1	+14	Volts	(13 cells)
2	+ 7	"	(7 cells)
3	+ 6	"	(6 cells)
4	Gnd.		
5	- 6	"	(6 cells)
6	- 7	"	(7 cells)
7	-14	"	(13 cells)
