(CARRIER CONTROLLED RELAY)

25X1  
25X1

Dear [Redacted]

25X1

Under Contract (RD)XG-726 we have developed a so-called "Carrier Controlled Relay", and under Contract RD-35 we are supplying 50 of these units for use in some classified work. However, there appears to us to be no reason why the unit itself is classified.

We hope to be able to market the unit commercially for such applications as recording the traffic in CAA airport control towers. The system which we have in mind would consist of a two channel magnetic tape recorder, a Carrier Controlled Relay to actuate the recorder when traffic is being received, and a simple time signal generator now being designed which would put reference time signals on the second channel on the tape.

The enclosed report, [Redacted] describes the Carrier Controlled Relay. We will appreciate your confirmation of the fact that this equipment and its operation can be released to the public.

25X1

Very truly yours,

[Redacted Signature]
