New Equipment Designation

1. The following designations were assigned 17 March 1959.

AN-22 . . . 50 to 500 MC Antenna. The AN-22 is a fabric mounted, solid-tooth, logarithmically periodic structure covering the frequency range of 50 to 500 MC.

AN-23 . . . 500 to 1,000 MC Antenna. The AN-23 is a solid-tooth, logarithmically periodic antenna covering the frequency range of 500 to 1,000 MC. The antenna consists of a mountable, printed circuit board.

AN-24 . . . 1 to 10 KMC Antenna. The AN-24 is a solid-tooth, logarithmically periodic antenna covering the frequency range of 1 to 10 KMC. The antenna consists of a mountable, printed circuit board.

AN-25 . . . 10 to 40 KMC Antenna. The AN-25 is an electromagnetic horn antenna covering the frequency range of 10 to 40 KMC.

2. These designations were made on a tentative basis pending approval of this memorandum.
