

STANDARD FORM NO. 64

*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Director of Logistics

DATE: 13 February 1956

FROM : Chief, Printing Services Division

SUBJECT: Special Indicator for Logistics Technical  
Support Matters

REFERENCE: (a) Memo from Director of Logistics dated 9 February 1956,  
Same Subject

25X1A

(b) Notice 

1. Reference (a) requests Staff and Division Chiefs to submit a list of the type of purely logistical actions for which it is anticipated that a special indicator could appropriately be used. The Printing Services Division believes that matters pertaining to field printing should not be included in a list of such actions at this time.

2. Policy with respect to field printing is not completely clarified at the present time. Therefore, cables that are received on this subject usually require coordination with the Area Divisions and other DD/P elements. It is also felt that there are insufficient number of such cables at the present time to warrant their inclusion in the list of special indicators.

3. This Division anticipates further clarification of the field printing situation in the near future. At such time as cable traffic on matters pertaining to field printing can be handled without involving undetermined policy questions the Division will provide the inclusion of these cables in lists of special indicators.
