REF: Memorandum to Administrative Officer, [REDACTED], from the Chief, General Services Branch dated 9 November 1950, subject: Cleaning [REDACTED], Maryland, copy attached hereto.

25X1A6a

FOIAb3b1

FOIAb3b1

1. [REDACTED] located at [REDACTED], Maryland consists of an operations building having approximately 10,275 square feet of floor space with heating plant and air conditioning system, a shop and storage building of approximately 885 square feet, a garage and emergency generator shed of approximately 1,120 square feet, an antennae field of 96 acres, plus lawns, shrubs, incinerator, etc.

25X1A6a

FOIAb3b1

2. Custodial help now provided the [REDACTED] consists of one full time custodian and one custodian-chauffeur who can devote only one-half of his time to custodial duties. The two additional chauffeurs provided in the bureau T/O are under the direction of Services Division and devote their entire work week to driving duties.

FOIAb3b1

3. Actual experience and close observation since activation of the station on 1 April 1950 have clearly demonstrated that the one full-time and one part-time custodian are incapable of providing adequate care and maintenance of the [REDACTED]. Obviously, excessive deterioration of this valuable government property can be expected to occur unless sufficient custodial services are provided. It is believed that one additional, full-time custodian would enable the [REDACTED] to adequately maintain all buildings and grounds with the possible exception of the antenna field which may require servicing about once yearly on a contract basis.

FOIAb3b1

FOIAb3b1

FOIAb3b1 It is therefore requested that the T/O of the [REDACTED] be increased by one custodian, CPC-4 at the earliest practicable date.
