

MEMORANDUM FOR: Inspector General

SUBJECT : Inspection of Personal Effects, [REDACTED]

25X1A

25X1A

1. This case indicates laxness in accountability for and control of Agency materiel. It also indicates carelessness on the part of [REDACTED] in handling such materiel. The Logistics Office now has a task force in Europe. The mission of this force is to inventory all Agency materiel and to put in force procedures which will provide for proper accountability and control of Agency materiel. These procedures will cover requisitioning, charge-out, and follow-up of all Agency materiel.

25X1A

2. In regard to [REDACTED], I go along with the thinking of the Military Personnel Division. I suggest, however, that [REDACTED] be called to task because of this incident; at this time the necessity for accounting for Government materiel should be pointed out to him, as well as the seriousness of appropriating Government property.

L. K. WHITE  
Acting Deputy Director  
(Administration)
