19 AUG 1966

MEMORANDUM FOR: Special Assistant to the Deputy Director for Support

SUBJECT   : Office of Finance Projects Requiring Computer Application

REFERENCE   : Memo to C/AD/OCS, dtd 22 Mar 66, fm D/Fin, same subject

    1. Reference (copy attached) transmitted to the Office of Computer Services a list of projects considered at that time appropriate for computer application with identification of the requested timing for such applications. There are many other areas relating to the financial management functions performed by this Office which are considered essential for computer applications as soon as programming capabilities by the Office of Computer Services become available.

    2. In order to provide you, as the coordinator for the Deputy Director for Support, with information as to the long-term requirements of this Office for computer applications, insofar as they are now known; attached is a list of projects which would be sound for computer applications, together with identification of the relative timing which should be accorded each. The projects listed in the Attachment are in addition to the thirteen (13) projects previously reported to the Office of Computer Services in reference.

    3. Many of the projects identified in the Attachment have been the subject of discussions with representatives of the Office of Computer Services; however, action by this Office to transmit specific written proposals or work orders for most of the projects listed to the Office of Computer Services has been purposely deferred because of the indications received from that Office that it is not in a position to undertake additional programming requirements for some time to come. It is believed important, nevertheless, to provide this list of computer applications to you for your information in connection with both your computer coordinating responsibility and your general responsibility for supervising the activities of the Resources Study Groups.
