SEARCH OF MISSION 9031 FOR ICBM ACTIVITY
ALONG SOVIET RAIL LINES

This report presents the results of a search, for ICBM activity, of all rail lines in the USSR covered by photography from KEYHOLE Mission 9031 (February-March 1962). A previous publication 1/ gave the results of a search of Missions [REDACTED] and explained the standards used.

25X1D

The total length of Soviet rail line searched with negative results for ICBM activity in accordance with the established criteria 1/ is now 42,800 nautical miles. The Graphic Supplement* to this report consists of overlays to the 66 World Aeronautical Charts (WACs) that, together, show all the connecting rail lines known to exist in the USSR. Sixty-three of these overlays show the rail lines searched with negative results on the basis of this and the previous search. These overlays also indicate the location of all ICBM launch complexes identified to date. The search of Mission 9031 has resulted in revisions or additions to 36 of the WAC overlays.

*Copies of the Graphic Supplement have been forwarded to the CIA requester and to the TALENT Control Officers of Army, Navy, Air Force, and NSA. Further reproduction and dissemination of these overlays to subordinate commands will be the responsibility of the above agencies.
