CLASSIFIED BY: 009907
Exempt from General Declassification Schedule
of E.O. 11652, Exemption Category: 5B(2)
AUTOMATICALLY DECLASSIFIED ON
DATE IMPOSSIBLE TO DETERMINE

SECRET

The accompanying nomenclature list for ground forces order of battle is the first in a series being compiled by the National Photographic Interpretation Center for internal use in reporting order of battle (OB) in first- and second-phase reports. Only equipment produced in Warsaw Pact countries and China is included.

The list is based on the May 1972 STANAG nomenclature list, but it has been expanded in a few topical areas. It is designed to standardize terminology when reporting OB in order to minimize discrepancies that impede computer retrieval of specific items of equipment.

Please read the introduction and look through the table of contents to become familiar with this tool. Questions on terminology and recommendations for adding new terms should be coordinated with [redacted] NPIC Ground Forces Coordinator, or [redacted] 25X1A

INTRODUCTION TO THE USE OF THE LIST

The following list gives the approved way of citing equipment when listing order of battle for ground forces. Each item in the left column is given with the proper spacing, with hyphen or slash mark, and abbreviated if needed to fit within the 24-character space. Blip sheets and all other forms on which OB is written by the PI have the 24-character spaces indicated, so when writing a long term which does not fit, check the approved form in the list rather than improvising. All terms are singular.

Become familiar with the items of equipment that you will be reporting and use the exact form given in the list. Note apparent inconsistencies such as this on page 1:

SHADDOCK MSL TRANSPORTER

SCUD OXIDIZER TRNSPRTR

This occurs because SHADDOCK MISSILE TRANSPORTER would have 25 characters even if transporter had been abbreviated by eliminating all vowels (trnsprtr).

Most equipment is cited by model number only, as: T-10M (not T-10M TANK); DDA-53 (not DDA-53 DECON VEHICLE).

When the model cannot be determined, do not use the word--TYPE. Use the descriptive generic term shown underlined in the left column:

HEAVY TANK, ROCKET LAUNCHER, or FA PIECE. Similar models which can-

not be precisely distinguished may be cited as JS-3/4, FUG/OT-65, or R-401/405. On the other hand, no models are cited that use a number or letter in parentheses. The present computer retrieval program cuts off anything that follows the opening parenthesis. That is the symbol used to indicate that what follows is additional descriptive information, not actually part of the equipment name.

Follow the current set of elements of essential information (EIs) for ground force facilities (GG-), being careful to list equipment under the proper trinome. The trinome has usually been indicated after main headings in the following list, but occasionally specific items have the trinome indicated in the information column on the right. Derelict and dummy equipment should be listed under the OBJ trinome: DERELICT TANK; DUMMY SA-2 MISSILE.

Adjectives should go in parentheses in the space for additional information below the date. The computer searches on the basis of the first letters in the target name space and does not recognize that a SMALL VEHICLE or UNIDENTIFIED RADAR should be associated with the second word, not the first.

Such words as NUMEROUS and SEVERAL are almost meaningless. Try to give some indication of number, using space in the additional information line for such qualifiers as (AT LEAST) or (APPROXIMATELY).

Country codes used in this list are UR (Soviet Union), GC (East Germany), CZ (Czechoslovakia), BU (Bulgaria), PL (Poland), RO (Romania), and HU (Hungary).

<u>AIR COMPRESSOR TRUCK*</u>	
<u>MISSILE DOLLY*</u>	OBJ
<u>CANISTER*</u>	OBJ
<u>CRATE*</u>	OBJ

*Underlined generic terms may be used in reporting OB when the equipment cannot be specifically identified. The generic term should be included in highlights, special cables, and reporting for the general reader.

WARHEAD VAN*

SET OF BOGIE WHEELS

OBJ

B. TRACKED ARMORED FIGHTING VEHICLE (AFV) report as GFW

1. HEAVY TANK*

If tank model cannot be determined, use HEAVY TANK or T-10/10M, not T-10 type. has bulge on rear of turret

T-10M

T-10

JS-3/4

JS-2

sloped frontal armor

JS-1

stepped frontal armor

2. MEDIUM TANK*

If tank model cannot be determined, use MEDIUM TANK or possible models

MEDIUM TANK M-1970

T-62

T-55

no ventilator dome visible

T-54

ventilator dome forward of hatches

T-34

3. LIGHT TANK*

LIGHT TANK M-1970

If tank model cannot be determined, use LIGHT TANK

*Underlined generic terms may be used in reporting OB when the equipment cannot be specifically identified. The generic term should be included in highlights, special cables, and reporting for the general reader.

- PT-76
4. TANK/ASSAULT GUN*
5. ASSAULT GUN*
- JSU-152 heavy assault gun with short tube
- JSU-122 assault gun with long tube; superstructure is set back from front of hull
- SU-100 assault gun tube offset to right; commander's cupola protrudes from right of superstructure
- ASU-85 tube slightly offset to left
- SU-85 assault gun
- SU-76 assault gun with tube mounted to the rear
- ASU-57 airborne assault gun
- C. ARMORED PERSONNEL CARRIER (APC) Report as GFW
1. TRACKED APC*
- BMP amphibious armored infantry combat vehicle
- BTR-50P amphibious APC with soft top
- BTR-50PK hard top

*Underlined generic terms may be used in reporting OB when the equipment cannot be specifically identified. The generic term should be included in highlights, special cables, and reporting for the general reader.

BTR-50PU	command vehicle
OT-62A	amphibious APC with overhead cupola, no cover. CZ, PL
OT-62B	like 62A but with cupola mounting 7.62mm machine gun. CZ, PL
OT-62C	like 62B but with 14.5mm AA turret. CZ, PL
2. <u>WHEELED APC*</u>	
BTR-60P	use for undetermined model also
BTR-60PA	similar to 60P, but with armored top
BTR-60PA COMMAND VEH	armored top vehicle with folded dipole antenna (R-102M) canvas-covered "box" in center of top. Also known as BTR-60PU
BTR-60PB	overhead cover and forward turret
BTR-60PB FAC	has turret, box at rear
BTR-152	6 x 6 APC
BTR-152K	same with overhead covered
BTR-152U	same, armored command vehicle

*Underlined generic terms may be used in reporting OB when the equipment cannot be specifically identified. The generic term should be included in highlights, special cables, and reporting for the general reader.

~~SECRET~~

BTR-40	4 x 4 APC
OT-64A	CZ, PL
OT-64B	machine gun in shielded mount, CZ, PL
OT-64C1	has Soviet BTR-60PB turret. CZ, PL
OT-64C2	has AA turret. CZ, PL
3. <u>ARMORED CAR*</u>	
BRDM-2 AIR DEF MODIFIED	H-configured launcher
BRDM-2 SAGGER	6 SAGGER antitank guided missiles (ATGM)
BRDM-2 COMMAND	no turret, charging engine on roof
BRDM-2 RKH	chemical defense
BRDM-2	turreted amphibious armored reconnaissance vehicle (AARV)
BRDM SNAPPER	3 SNAPPER antitank guided missiles (ATGM)
BRDM SWATTER	4 SWATTER ATGM
BRDM SAGGER	6 SAGGER ATGM
BRDM RKH	
BRDM	amphibious armored recon- naissance vehicle

*Underlined generic terms may be used in reporting OB when the equipment cannot be specifically identified. The generic term should be included in highlights, special cables, and reporting for the general reader.
