Enclosed are copies of two write ups by

STATINTL

STATINTL

*Project #
#*

5413 a. Elastic Surface Transformation

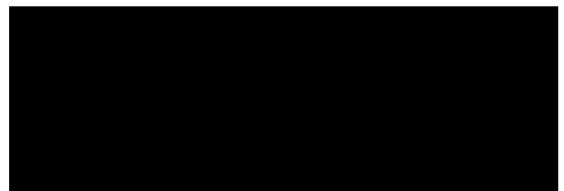

5414 b. Automatic Image Extraction for Cueing Photo Interpreters

I received these last week and have only very briefly looked at them. I think this type of activity on my part should fall into Task II. What do you think?

Should this information be directed to Dick or George or both?

STATINTL

is an experimental psychologist who is interested in various special presentations of imagery to an observer.
