

READABLE COPY

TO:

Rather than jeopardize the entire color effort with this single item I have decided against putting it forward at this time. Contrary to popular opinion, the situation is really still green for color projects. However, they must be carefully presented against intelligence, rather than briefing board type production.

What color program?

"Motherhood"

This proposal and covering letter says nothing about a realistic survey of existing drying processes - has one been made? How does dry color? <sup>by roll</sup> It makes only a poor case at best for such an expensive study. Lets be imaginative

yes

- Track of Committee

STATINTL

What else in the building needs help if we get any quantity of color material? Certainly many other items will need modification and replacement. It looks as if we have considered only a single item - not the problem as a whole. If it
