MEMORANDUM FOR: Chief, Technical Intelligence Division, NPIC
ATTENTION: Chief, Technical Services Branch
SUBJECT: Effect of Magnetic Tape Strip on Data Block Readers

1. The roll of film submitted to P&DS/DB/SSS containing the magnetic tape strip between frames has been examined with respect to interference with automated data block reading. The two readers now being built will be able to handle material such as that examined, since the strip is sufficiently removed from the binary data block.

2. Any change in location or enlargement of size of the strip with reference to the binary data should be brought to the attention of P&DS/DB/SSS.
