**DECLASSIFICATION REVIEW BY NIMA / DoD**

MEMORANDUM FOR: Assistant for Plans and Development, NPIC

25X1A ATTENTION: [REDACTED]  
SUBJECT: [REDACTED]

25X1A

1. Reference is made to your verbal request that a member of IPD accompany the contract monitor to [REDACTED] during the week of 15 February for preliminary in-factory acceptance tests on the [REDACTED]

25X1A

While we are not familiar with the terms of the contract which call for preliminary in-factory acceptance tests, we believe it would be inadvisable to participate in such tests at the factory. Final acceptance of the plotter is dependent upon its operating on-line with the 490 over a continued period. While it would be possible for us to observe the plotter performing its various functions, it seems to me it is not a suitable test of its capability to operate on-line with the 490 and I do not feel we should in any way prejudice our right to insist upon full and precise continuous operational checks of the plotter once installed in [REDACTED] should satisfy themselves that the plotter works to meet specifications prior to their shipment of it here. For these reasons I do not plan to send anyone to [REDACTED] to participate in factory acceptance tests.

25X1A

25X1A

2. Please advise the conditions for acceptance of the plotter as specified in the contract with [REDACTED]. I trust that these call for operation over a period of at least 30 days on-line with the 490, in accordance with test procedures which we develop, without remedial maintenance. If this is the case, we will attempt to develop a test routine which will exercise all possible combinations of commands to the plotter.

[REDACTED]
