STATOTHR

Washington, D. C.

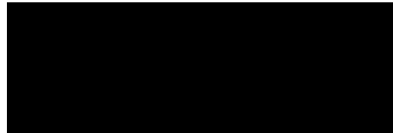

Dear Ray:

When I spoke to you Wednesday I forgot to mention the vacuum requirements for the plotter table. We will need a vacuum capacity of approximately 50 cubic feet per minute at 1 psi vacuum. This specification is not exact and any excess capacity is certainly satisfactory.

letter of

to

Regarding the paper rolls, we have not examined all sources for standard sizes yet, but there appears to be no serious problem in either procurement or perhaps modification of the roll. We will advise you more on this later.

Sincerely
STATOTHR
