Ultra High Resolution Diffraction Viewer

The study is nearly complete and they expect to make a presentation of results on Friday June 14. They apparently have a close working relationship with [redacted] and the two companies present a good combination of skills.

STATINTL

Although the diffraction viewer approach appears to be limited to about 12X magnification, they believe there auxillary techniques which will extend this.

It was not clear why such a limitation exists but it will be dealt with more fully in their report.

STATINTL

They are preparing a proposal for preparation of [redacted] for the Photo Interpreter. I did not see the proposal and declined to review it on the basis I would have little to contribute in the way of helping define the problem.
