Subject:  Consultant  
Your letter 5 March 196325X1A   
After careful review of your letter we wish to assure you of our complete willingness to cooperate fully with you by discussing technical matters pertaining to specific assignments with 

25X1A Because of the peculiar nature of our engineering and development work it is extremely difficult to isolate proprietary information when involved in engineering discussions.

25X1A As  will no doubt be acting as technical consultant with firms who may be in a competitive position with us, and who may also be contracting with you, we will require him to enter into an agreement with us which is the customary procedure when retaining consultants on engineering problems.25X1A Again, let us assure you of our desire to expedite your requirements. We have met  and are greatly impressed with his capabilities.25X1A   
President
