MEMORANDUM FOR: Assistant for Plans and Development, NPIC

25X1A SUBJECT : [REDACTED] Report and 1967 Technical Development Plan

25X1A 1. The [REDACTED] IIS report as you know indicates that its group has gone
25X1A deeply into the area this division has requested be studied. Our under-
25X1A standing was that the [REDACTED] would not include this area in its study.

25X1A 2. A reading of the [REDACTED] report raises the question as to whether or
25X1A not the requested study of "Reporting Techniques and Equipment" is now
25X1A needed, particularly as far as the computerization of typesetting and com-
25X1A position are concerned. We are, however, unclear as to the degree of the
automation of graphics production that can be expected to result from the
[REDACTED] study.

3. We would appreciate hearing the views of you and your staff on
these questions.
