

13 April 1964

MEMORANDUM FOR: PDS/DB

ATTENTION: [REDACTED]

25X1A

SUBJECT: Electrical Power Available in No. 3 Section Photographic Laboratory, [REDACTED]

25X1C

1. For your information the following selection of electrical power is available in the laboratory at No. 3 Section, [REDACTED]

25X1C

25X1C

- (a) 230 v 50 cycle - single phase [REDACTED]
- (b) 110/115 v 60 cycle - single phase (multiple outlets)
- (c) 220 v 50 cycle - three phase (confined to the film dryer of the H.F. HTA/3 Processor)
- (d) 440 v 50 cycle - three phase, four wire (standard three-phase power supply)

2. In the interests of flexibility, we have always endeavoured to ensure that instruments and equipments of U.S. origin can operate from the normal domestic supply whenever it is feasible for them to do so. It is particularly essential to apply this rule of flexibility to any equipments operating outside the environs of the Photo Lab proper.
