

September 7, 1965

Dear George:

Here is the draft of the report on the wide film study. Because of the classification of this document we were not able to reproduce it here. And, since tissue copies are not very nice to work with you might want to Xerox it to speed up the review.

In particular John C should be given a copy for his comments. Others such as, Frank, Bob, and John P. might also be interested. I will let it up to you as to how far to go with the review, however. Too many cooks may spoil the broth.

I plan to be in your office Monday September 13 for the usual two week stint. Please let Ken know that I am coming for sure.

Best regards.

Sincerely,

25X1A
