6 May 1966

MEMORANDUM FOR: Assistant for Plans and Development
THROUGH: Chief, Development Branch, P&DS
SUBJECT: Modulated Light

1. On 21 April 1966 the following individuals met to discuss the proposed Modulated Light Imagery Systems Program:

25X1A

No Plans Branch representative was able to attend, but the decisions outlined here were later discussed with and approved by

25X1A

2. The following conclusions were reached at the meeting.

a. There is valid research to be accomplished in modulated light techniques.

25X1A

b. Although [redacted] presented the best proposal in response to the Modulated Light Binders Conference, that proposal did not offer sufficient promise to warrant the proposed cost.

c. Developments in photochromics make it worthwhile to re-evaluate that technique.

d. EDIB will evaluate various Modulated Light techniques. When this evaluation indicates it will be profitable to fabricate any breadboard or prototype hardware, the project will then be turned over to the DB for action by the appropriate section.

3. It is therefore recommended that the Modulated Light Imagery Systems Program be cancelled, the prospective contractors be so notified, and any further work concerning Modulated Light be carried on as individual projects.

DECLASS REVIEW by NIMA/DOD
