DECLASS REVIEW by NIMA/DOD

25X1

635 PROGRESS REPORT

Period Covered: June 1966
Document No.: OD-124
Dated: 18 July 1966

PRESENT STATUS

All fabricated parts have been released with the exception of a few parts required for the high intensity tracking light sources.

The main castings have been received from the foundry and are undergoing inspection.

25X1 The damaged [] Versatile Stereoscope has been re-
25X1 paired and returned to [] by the manufacturer. In-
coming inspection has reported that the instrument is in good
physical condition. The unit has not been tested optically,
however.

PROBLEM AREAS

Tracking Light Sources - The design problems with the high intensity tracking light sources reported previously have not been resolved. However, to prevent further delay in delivery, fabrication of the balance of the instrument is under way with the belief that the remaining design problems will be resolved early in the assembly phase.

Approved For Release 2004/03/26 : CIA-RDP78B04747A002200020031-2

635 - OD-124

PROJECTED WORK FOR JULY (3 Week Period)

Fabrication of parts will be 25% completed. It is doubted whether any subassemblies will be started.

Financial Report

A financial report for the month of May is enclosed.

Approved For Release 2004/03/26 : CIA-RDP78B04747A002200020031-2
