25X1A

MEMORANDUM FOR THE RECORD

SUBJECT : Utilization of the 24-Inch Paper Processor
████████ in PSD Spaces

25X1A

1. ██████████████ contacted me on 28 July to inquire about the

status of the lead tab apparatus on the ████████ I told him we planned 25X1A

.to contract for it (locally) and that ████████ was budgeted; the bread- 25X1A

board of the lead tab addition appears to be satisfactory.

2. PSD cannot wait much longer for the ████████ to be in operation. 25X1A

Bill said it was "killing him" to have the processor standing idle.

He has a personnel shortage and believes it imparative that the processor

be placed in operation very soon. Bill has great faith in the potential 25X1A

.of the processor and will use it to battle the present procedure of

each man in his division doing his own processing. Bill also ~~might~~

does not want to build up his night crew nor the overtime hours.

He wants the ████████ operating now.
