

May 1, 1963

Dear John:

As you requested at our meeting on the 26th, we have revised our cost breakdown to separate the breadboard activity (16 week duration) from the rest of the program. This information is attached. We have included in the breadboard phase the procurement of the raw glass and the invar forgings. The Terms and Conditions furnished you with my April 25 letter still apply.

As we discussed we plan to conduct this project in our Conn. Ave. Plant making use of those facilities and personnel to the fullest advantage as their knowledge of and access to the program being conducted there will contribute greatly to the success of the program proposed here. In that connection and for security reasons we suggest your consideration of contracting for this work through the group that has responsibility for the other program.

Please call me if you need additional information.

Charlie

Dear John:

We are pleased to submit our proposal on the Coherent Light Enlarger and Spatial Filter. The proposal consists of Engineering Report No. 7354, the attached Terms and Conditions and a cost breakdown.

We believe our solution to the particular problem involved here to be both unique and technically sound and look forward to our discussion of this with you tomorrow. We solicit your interest in having us perform this work and are prepared to negotiate a contract for it at your contracting group's earliest convenience.
