

IPO/OSB/M-149-66
12 June 1966

Declass Review by NGA.

MEMORANDUM FOR: Assistant for Plans and Development, NPIC

ATTENTION:

SUBJECT: Completion of Dovetail Modifications to Zoom 70
Microstereoscopes

REFERENCE: Memorandum IPO/OSB/M-146-66, dated 16 May 1966

1. As of 8 June 1966 the following number of PAG employed 70 microstereoscopes have been provided with the dovetail modification:

- a) From PAG 103
- b) From IAD 36
- c) From DIA 9

Total 148

2. Considering the number of microstereoscopes and the conditions which existed, PAG feels that the operation was carried out very well. There is one problem that still remains however, and that is to identify the two additional parts that have resulted from this modification. These pieces are now marked with tape which is at best a temporary expedient. The referenced memorandum requested that serial number plates be made available for permanent identification of these pieces. Although no reply to this request has been received to date, PAG suggests that this matter be considered. Approximately 394 plates are required to identify not only the extra pieces resulting from the modification but also pods and rhomboids that do not have plates attached. PAG will provide serial numbers and the number of plates required if such arrangements can be made.

3. Thank you for your cooperation and the expeditious manner in which this modification was handled.

Colonel, USA
Assistant for Photographic Analysis, NPIC
