Attention: Bill K
Subject: RFP No. RD-2-67
Project No. 02097
Reference: Telephone Conversation October 12, 1966
[Redacted] Quotation Dated September 28, 1966

25X1

Gentlemen:

Referring to telephone conversations with your technical representatives, [Redacted] is pleased to clarify our recent proposal.

25X1

The costs submitted for follow-on quantities are per pair. Our quotation for Phase I in the design and development of a prototype is attached. Phase II costs are represented by the difference between Phase I costs and the total cost as listed in the summary sheet submitted on September 28, 1966.

Shop drawings will be supplied as you have requested. In addition, our final design for the prototype will be revised to permit one handed operational adjustments wherever practical.

The enclosed drawings may serve to further clarify the concept proposed for the Improved Anamorphic Eyepieces. The drawing has been annotated to point out the intended interface of the eyepiece with the High Power Stereoviewer. This is indicated by points A and A¹.

I hope that this information will be of assistance to you, if you have any further questions concerning our proposal, please feel free to contact us.

Group 1

Very truly yours,

Excluded from automatic
downgrading and
declassification
