16 March 1966

MEMORANDUM FOR: Chief, Information Processing Division/NPIC  
THROUGH: Chief, Technical Intelligence Division/NPIC  
SUBJECT: TID/TAB Requests for Program Changes to the Human Error Analysis Program

TID/TAB, as requested by IPD in Memorandum NPIC/IPD-80/66, is submitting through channels a formal request to modify the Human Error Analysis Program formerly referred to as the Faux pas Program and worked under Project No. 99710-4. This modification requirement is being levied to incorporate into this program an additional mathematical refinement designed to improve the accuracy of the results obtained from the Human Factors' error study. It was discovered by [redacted] that the original mathematical model provided to IPD by [redacted] did not yield the required accuracy and for this reason the original program must be modified to include the new mathematical changes.
