NARRATIVE REPORT

INTERIM

FINAL

On 20 January 1966, a monitoring trip was made to [redacted]

1) Recent research was somewhat curtailed due to [redacted] primary allocation to a priority, Agency project. This situation should be alleviated shortly.

2) Since the last interim report, significant material has been received from [redacted] in the areas of flicker fusion and laser hazards as related to vision. Future areas of suggested investigation will be optimal viewing format, stereo scanning perception considerations and oscillating or "dithering" screens for image enhancement, in addition to other areas of vision holding possible implications for photo interpretation. A compilation of organizations performing vision research will also be forthcoming.

3) The possibility of arranging an NPIC visit for [redacted] will be investigated. Such a visit would give him a better grasp of our specific problems, and enable him to perform more efficiently on this contract.
