MEMORANDUM FOR: Assistant for Plans and Development, NPIC

ATTENTION : 

SUBJECT : Case for  M-5 Eyepieces

STAT

1. At present there is no adequate method of storing the various eyepieces that are used with the  M-5. Envelopes are used however, no protection is afforded the eyepieces and dirt accumulation is a problem. Some type of holder or box is required for storing the eyepieces.

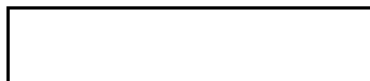

STAT

2. It is requested that the P&DS advise PAG of the possibility of obtaining a box that can be used for storage of the  M-5 optics.  was given a series of rough sketches of the eyepieces; however, it is considered more appropriate if a set of eyepieces were obtained from one of our instruments and exact measurements and configuration determined.

STAT

3. Your comments on this problem would be appreciated.
