SUBJ: Tubes for Adapting [ ] Eyepieces to Dynazoom Microscopes

1. As you are probably aware, we have experienced considerable difficulty in mounting these tubes on our Dynazooms. All screw on with an undesirable amount of effort - some worse than others. By a process of trial and error we expect to be able to mount tubes on the 20 Dynazooms in our stock, since the [ ] change in their "thread" specifications created an unwanted surplus of existing tubes. We are concerned, however, that the next quantity of tubes to be manufactured by [ ] (60 pairs for IAD) may also be difficult to install.

2. It is requested that you insure close coordination between the P&DS and [ ] in order to avoid a reoccurrence of the problem outlined above.

We discussed this problem on 27 July 1966 and also the problem of fitting the [ ] eyepieces into some of the adapters.

Close coordination will continue between P&DS and [ ] and you may be assured that there will be no recurrence of these difficulties.
