Dear George:

Enclosed are the operating instructions for our motorized film transport for the MIM-4.

I was not fully satisfied with the location of the scribe marks for different film sizes. I suggest that your people experiment with different locations and when they are satisfied, they can black out the existing lines and scribe new ones.

We have submitted our invoice to Walt who is forwarding it to finance. Walt tells me you must prepare a receiving report and submit it to finance. Finance matches the receiving report to the invoice and then prepares payment. I would greatly appreciate it if you will expedite submittal of the receiving report so we can get paid.

I expect to be in WDC in a few weeks on Rod's work and I'll stop by and see you than.
