NARRATIVE REPORT

 INTERIM** FINAL

1. Previous work on this contract has produced photographic images in pink, yellow, and sepia. For photo-interpretation purposes, these colors are undesirable; the most desirable being a blue-black image. Much of the effort during February and March was directed toward this goal. Experimentation during this period developed no suitable blue-black dye, therefore, this effort will continue along this line of development.

2. Progress has been made during this period in the development of a stripping film which could result in a flexible photo-sensitive material (a very desirable product). In the past all of these sensitized materials have been coated on glass.
