*John, Thank you for your confidence and appreciation of the work.*  
*and*

Dear John,

Contract:

I received the contract for FY 65 services on Tuesday, September 22, and have executed it and returned it. It covers the period from July 1, 1964, through June 30, 1965. Enclosed for your information is a copy of my transmittal letter.

The statement of work requires that reports be submitted in five copies. I discussed this with Bill G. and he says the five copies should be sent to the Contracting Officer who will then forward copies to you. This is a change from previous requirements in which I sent one or two copies directly to you. Henceforth I will send five copies as directed unless you and Bill G. get together and decide you want it done differently.

Lasers for Measurement

John R. and I discussed this subject yesterday and he is quite concerned over the application of lasers to measuring engines. He would like a literature search performed and an analysis of the limitations of lasers for submicron measuring. I told him it could probably be done under Task II of our contract, and I would write it up for your consideration.

W.D.C. Trip

I'm still planning on scheduling a trip to your office for the week of October 11 to 17. Is this still good timing?
