

Final

MEMORANDUM FOR: Chief, Support Staff

ATTENTION : Chief, Security Branch

SUBJECT : Additional Classified Information Processing Equipment for Proposed Use By the NPIC

REFERENCE : NPIC/P&DS 139-64 Memorandum dated 3 August 1964

1. Remote writing ~~equipment~~ and facsimile reproducing equipment ~~installation had been considered during the remodeling of~~

Due to security reasons, this type of equipment was never installed.

More recent requests from PID ~~on 10 April 1964 and 13 August 1964~~ have again raised the question ^{of} concerning the use of these instruments.

~~Since security regulations and instrument testing procedures change,~~

~~I~~ It is necessary to determine whether there be any signal emittance

from these instruments that will violate present security regulations. ^{Since the use of these instruments requires a transmission line it also will be necessary to determine if a cable is available} Top Secret material ~~is to~~ be transmitted over this equipment. This

request for instrument tests is in addition to that of the referenced memorandum.

2. The following is a list of instruments being considered for installation:

1. Autowriter Transmitter, Model DS and Model DX
2. Autowriter Receiver, Model DSR and Model DSX
3. Transceiver, Model C
4. Receiver, Model C
5. Quik-Fax Transmitter
6. Quik-Fax Receiver

Declass Review by NGA.

Since the use of these instruments requires a transmission line it also will be necessary to determine if a cable is available.

[Redacted]

the following Electrowriter equipment:

- 1. Transceiver
- 2. Transmitter
- 3. Receiver
- 4. Copy Receiver

[Redacted]

[Redacted]

the following Datafax equipment:

- 1. Transmitter (3 minute), Model FT 3628
- 2. Receiver (3 minute), Model FR 3628
- 3. Transmitter (one minute), Model FT 9095A
- 4. Receiver (one minute), Model FR 9095A
- 5. Transmitter (dial operation), Model FT-18ODP
- 6. Receiver (dial operation), Model FR-18ODP

~~3. All of these instruments require a transmission line. It is necessary to determine whether a cable that will meet Agency security standards is available. The equipment will be used in lieu of the internal gray telephone, at times, thus necessitating a Top Secret transmission approval.~~

3 A A prompt reply would be appreciated concerning the security status of the above listed equipment. Present requirements at NPIC *indicate a need for* dictate the use of this or a similar type of equipment for interoffice communications.
