DRAFT--

MEMORANDUM FOR: Chief, Support Staff

ATTENTION : Chief, Security Branch, ~~SA~~

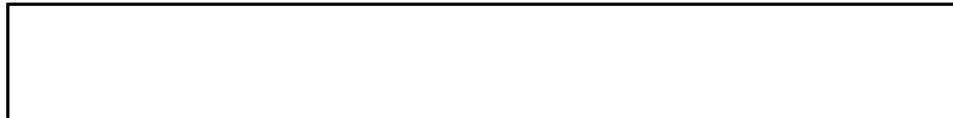

SUBJECT : Additional Classified Information Processing
Equipment for Proposed Use By the NPIC

REFERENCE : NPIC/P&DS-139-64 Memorandum dated 3 August 1964

Collected from

1. A request has been received by the P&DS for determining the feasibility of installing remote writing equipment and facsimile producing equipment within NPEC. Before any steps can be taken to provide these instruments to the requesting components, it is necessary to determine whether there be any signal emittance from these devices that will violate security regulations. Top Secret material is to be transmitted over this equipment.

2. The following is a list of instruments being considered for installation:

1. Autowriter Transmitter, Model DS and Model DX'
2. Autowriter Receiver, Model DSR and Model DSX
3. Transceiver, Model C
4. Receiver, Model C
5. Quik - Fax Transmitter
6. Quik - Fax Receiver

[Redacted]

the following Electrowriter equipment:

1. Transceiver
2. Transmitter
3. Receiver
4. Copy Receiver

[Redacted]

[Redacted]

the following Datafax equipment:

1. Transmitter (3 minute), Model FT 3628
2. Receiver (3 minute), Model FR 3628
3. Transmitter (one minute), Model FT 9095A
4. Receiver (one minute), Model FR 9095A
5. Transmitter (dial operation), Model FT-180DP
6. Receiver (dial operation), Model FR-180DP

3. All of these instruments ~~neecessitate~~ ^{require} a transmission line.. It is necessary to determine whether a cable that will meet agency security standards is available. The equipment will be used in lieu of the ^{internal} gray telephone, at times, thus necessitating a Top Secret transmission approval.

4. A prompt reply would be appreciated concerning the security status of the above listed equipment. Present requirements at NPIC dictate the use of this or a similar type of equipment for interoffice communications.
