Subject: Contract Retractable Power Cord for MLT 1540 Light Table

Gentlemen:

Confirming our recent discussions, agrees to provide modification kits for an improved retractable power cord for the MLT 1540 at no additional cost to the Government, with the Government providing the necessary services and simple tools to install these improved cords on a field retrofit basis. Specifically, this includes the following:

STAT

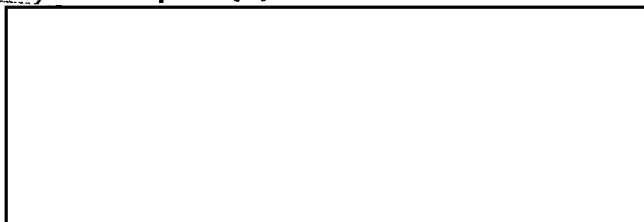

1. Improved three-wire retractable power cord operable in the retracted or extended condition. In the fully retracted condition it will operate within ratings in an ambient up to 80°F; when partially retracted, it will stand higher ambient. The cord will have pigtail leads on both ends, for hookup to the table and the 3-prong plug.
2. Appropriate mounting hardware for replacing existing retractable cord unit with that described in (1) above.
3. Written instructions and simple installations aids as required to allow the Government to accomplish field retrofit.
4. Return of all replaced cord units by the Government to FOB point at Los Angeles facility.

STAT

STAT

If you concur with this matter, we will proceed to provide the appropriate retrofit kits as soon as practicable.

Very truly yours,

STAT
