STAT

The following is a tentative schedule for all trips to be made under the Optical Image Manipulation contract by [redacted] personnel to NPIC. This list should be considered firm but individual trips may be changed if a need arises. Also for certain occasions (unanticipated problems, briefings, etc.) trips may be added to the list.

STAT

The trips themselves will involve one or two people though when two are involved both should be scheduled in the same week but with minimum overlap. The trips should be as long as practical (generally three days) with at least a week between trips. This trip duration will serve as a guide but the actual length of any individual trip will be geared to the individual situations.

The general philosophy behind both the duration of and the time between trips is to allow the maximum interaction between [redacted] and contractor personnel while causing minimum disruption of ongoing [redacted] activities.
