

NPIC/TSSG/DED-1583-69  
14 April 1969

MEMORANDUM FOR: Chief, Technical Services & Support Group, NPIC

SUBJECT : Electronic Man (EMAN) Manufactured by [redacted]

25X1  
25X1  
25X1  
1. The "EMAN" is a remote controlled, counter rotating prop helicopter developed by [redacted] under a contract with the Navy for use in Anti Submarine warfare. It was used as a platform, remote from a destroyer, from which a torpedo could be launched against an enemy submarine. It is my understanding that the Navy did not renew their contract with [redacted]

2. It is also my understanding that ARPA has purchased three (3) of these vehicles but it is not clear how they intend to utilize them. Apparently, there has been some thoughts and efforts in DDS&T to use an "EMAN" type system as a low-level reconnaissance vehicle.

[redacted]  
Chief, Development & Engineering Division, TSSG
