18 May 1970

MEMORANDUM FOR: Chief, Technical Services & Support Group, NPIC
THROUGH : Chief, Research & Engineering Division, TSSG/NPIC
SUBJECT : Meeting with DDS&T on Near-Real-Time Exploitation

1. Pursuant to instructions by the Chief, RSB/RED, the under-
signed telephoned [redacted] in order to ascertain 25X1
the nature of a request he had made to NPIC. The following summarizes
that telecon.
2. On Monday morning, 25 May, representatives from DOD are to 25X1
meet with [redacted] and other DDS&T representatives and brief them
on the DOD concept as to how a Near-Real-Time System is to be used for
SAC purposes.
3. In preparation for this meeting, and probably in participation, 25X1
[redacted] wants NPIC to present two cases:
 - a. How does NPIC want to insert its exploitation functions
into the NRT loop in a meaningful manner?
 - b. What experience or knowledge does NPIC have with the use
of a video (TV) type display of imagery? How could it be
used?
4. Obviously, the first question is loaded and presents NPIC with 25X1
its chance to propose its role in NRT systems. Since this is dripping
with policy and the future of NPIC, I am passing it to [redacted] for
consideration.
5. Our best answer to the second question is [redacted] RED, 25X1
who has more experience, background, and know-how than anyone in NPIC.
I have spoken to [redacted] about this. 25X1
6. I gave no definite answers or commitments to [redacted] 25X1
except that we will contact him again soon; perhaps today.

SUBJECT: Meeting with DDS&T on Near-Real-Time Exploitation

7. The NPIC NRT Study Group Report is still in limbo, as far as I know. I don't know if [redacted] has come to any conclusions or even outlined a concept of the NPIC role in [redacted] did not mention the DDI, so I don't know if they are aware of this action or not. In any event, someone should speak again with [redacted] once the NPIC has its ducks in formation.
