MEMORANDUM FOR: Chief, Manufacturing and Services Division, ONR

ATTENTION :

FROM : Chief, CIA/PID (NPIC)

SUBJECT : Secured Installations, Chiu-Chiang, China

REFERENCE : Requirement No. C-RR3-80,399 (Project No. C 1021-63)

1. In response to Requirement No. C-RR3-80,399 (Project No. C 1021-63), a study was made from available aerial photography of the three partially secured installations located 5 mi south of Chiu-Chiang, China, to determine their function and size.

2. It has been determined that the installations' basic function is manufacturing, and that all three installations are currently under various stages of construction. The following information relates to each specific installation:

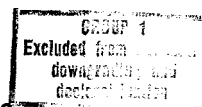

(a) Installation No. 1 - Located to the south of the other two installations (i.e., furthest away from Chiu-Chiang). Although this plant is almost completed, it is still not possible to determine its manufactured product on the basis of existing aerial photography. The installation's secured area is approximately 1,363,000 square feet.

(b) Installation No. 2 - Located between Installation No. 1 and Installation No. 3. The plant has been identified as a textile factory and has approximately 800,000 square feet of secured area.

(c) Installation No. 3 - Located to the north of the other two installations (i.e., closest to Chiu-Chiang). This plant is in the early stage of construction with approximately 183,000 square feet of area completed within a total of approximately 1,031,000 square feet of secured area. The installation's end manufactured product can not be identified on the basis of existing aerial photography but it is believed that Installations No. 1 and No. 3 will have identical functions.

Declass Review by NGA.
