

OPERATIONAL HEXADIC SAM SITES AND SUPPORT FACILITIES

SINO-SOVIET BLOC COUNTRIES

This brief presents a complete tabulation of operational hexadic surface-to-air missile (SAM) sites and support facilities in Sino-Soviet Bloc countries identified from all types of photography available at CIA/PIC.

25X1D

It is interesting to note that of the 133 SAM sites identified to date,

The following tabulation includes not only a total count of sites and support facilities at complexes, but also a net yield from each source of photography (KEYHOLE system, TALENT system, and other). The column titled "Other Photos" includes small-format aerial, ground, etc. This tabulation does not include the hexadic R & D and training SAM sites at the Kapustin Yar Missile Test Center or the R & D-type SAM sites at Sary Shagan Antimissile Complex, nor does it include the 33 identified herringbone SAM sites ringing Moscow.
