ORR REQUIREMENT NO. RR/HTA/E/R83/56: Report changes since 1944 in the number and size of buildings and external process installations at the Leningrad Chemical Plant "Krasnyy Khimik" 15.

REMARKS:

The Leningrad Chemical Plant, "Krasnyy Khimik" 15, reportedly an important producer of heavy chemicals, is located in the south part of Leningrad.

There have been no apparent major changes in the processing facilities of this large plant since 1944. Fourteen small storage and miscellaneous buildings have been removed and three small buildings have been added. Two of the original five vertical storage tanks have been removed.

The storage and waste piles are now approximately one-third as large as they were in 1944.
