ENCLOSURES: Annotated photograph of Brzeg Dolny Chemical Plant.

ORR REQUIREMENT NO: RR/HTA/E/R77/56: Report changes since 1944 in the physical layout of the Brzeg Dolny Chemical Plant, Dyhernfurth, Poland.

REMARKS:

Brzeg Dolny Chemical Plant, reportedly an important producer of organic chemicals, is located approximately 15 miles NW of Breslau (Wroclaw) Poland.

There appears to be little change in the basic layout of this plant since 1944.

The major change in this plant has occurred in the south part of the plant where several large buildings have been constructed which apparently replace many smaller buildings that have been removed. (See accompanying annotated photograph).

Several large storage-type buildings have been removed from the north section of the plant area.

The plant appears active. There is a noticeable increase of housing in the vicinity of the plant.
