ENCLOSURES: None

25X1A

OSI REQUIREMENT NO. HTA/SI/R-54/56: Identify any ASM testing installations in the Kerch-Bagerovo area, and search Kerch-Bagerovo A/F for [redacted] significance.

REMARKS:

Cloud cover precludes a detailed analysis of the Kerch-Bagerovo area. Only portions of the A/F are visible through the scattered clouds. Aircraft discernible on the field include one Bison, one Bear, one Bull, and six Badgers. This diversity of type would seem to indicate a research or testing activity.

What appears to be a bombing range exists approximately four miles to the north of the A/F. However, there are no identifiable installations on the field which would definitely indicate air-to-surface missile testing.

25X1A

There are no facilities in evidence to indicate [redacted]
